

April 13, 2011

Dear Representative:

This week, the U.S. House of Representatives will be taking up the FY 2012 budget, specifically H.Con.Res.34 (Rep. Ryan's "Path to Prosperity") and H.Con.Res.37 (the RSC budget proposal).

As you well know, America's economic prosperity and security is a moral issue. Today, the average American citizen is born into this world shackled and punished by over \$40,000 in public debt. This is an economic inheritance we absolutely cannot pass on to future generations of American families.

Both of the budget proposals move the ball forward in promoting and protecting the economic security of the United States, and begin the process of reforming our out-of-control entitlement system as well as slamming the brakes on Washington's reckless spending.

Traditional Values Coalition views these two votes as critical pro-family milestones. On behalf of the 43,000 churches we represent and the hundreds of thousands of activists and volunteers who help us in our work, *we urge you in the strongest possible terms to vote for both H.Con.Res.34 and H.Con.Res.37.*

In addition to alerting our churches and our supporters to these critical votes, we will be scoring your vote and alerting our membership on your decision to support or oppose these vital pro-family positions.

Our economic security is a moral issue, and the American people have been extremely patient in expecting results. On behalf of the hundreds of thousands of voices Traditional Values Coalition represents, I ask you to stand with the future, and reject the destructive tax and spend policies of the past.

Sincerely,

Andrea Lafferty
President
Traditional Values Coalition
